Geography Content Test (Baseline)

Time : 20 mins.

Marks :15

Instructions :

- All questions are compulsory.
- Each question one mark each.
- Tick mark on the most appropriate option.

**Q1. Write the meaning of the given Geographical terms :**

i) Altitude-

ii) Cyclonic wind -

iii) equator-

iv) food chain-

v) latitude-

vi) population explosion -

vii) light year-

viii) weathering -

xi) Meander -

x) international date line –

**Q2. Write the full form of the following Geographical terms :**

i) IST-

ii) GPS-

iii) mb -

iv) MSL -

v) KPH-

**S.P. Mandali's**  
**Tilak College of Education, Pune 30**  
**BED 106-08 General Science**  
**Entry Level Test Report 2023**

The academic year 22-23 of the College started on 26<sup>th</sup> December 2022, on the very first day, after the welcome ceremony the college conducted entry level test of the student-teachers who were admitted for general science as their method, for the same a Google Form was created and the link is provided in the Google Classroom BED 106-08 General Science, the link of Google Classroom is then provided to the student-teachers on the Whatsapp Group created by the College for the announcements, notices, circulars and effective communication, thus it was made mandatory to the student-teachers to join the Google Classroom compulsory. The first objective of this entry level test was to check the content knowledge of the student-teachers who are going to be the teachers in near future as well as these student-teachers have to conduct various lessons, practice lessons and internship lessons during these two years, so whether their general science knowledge is updated or not that was the main objective. The second objective was, if their knowledge is not update or some students found weak in the content knowledge, then college has to plan and implement some measures or remedial program to improve their content knowledge. The secondary objective of this entry level was if the student-teacher scored below the expectations then they would realize the reality, they will be aware in the future and show concern related to content, this will motivate them to learn more regarding content knowledge of science, most of the time it is assumed that the student's assume that they are graduate or post-graduate so they are having good content knowledge of school subjects, but that is not the reality, for instance a physics graduate can score minimum in the biology section or a vice a versa. So that they should not

*P. Mandali*

**PRINCIPAL**  
**Tilak College of Education**  
**Pune-411030.**

estimate themselves under any prejudice and start learning content knowledge immediately, another aspect is about the university examination. In Savitribai Phule University (SPPU) 80 marks content-knowledge paper is conducted by SPPU, so university is going to conduct the paper, there are 40 marks for one school subject method and 40 marks for other, and 20 marks are for practical and assignments, so the grades are depend up on university examination. Out of 40 marks 10 marks are for objective type questions, so if student-teacher is not choosing proper answer then they will get zero for the same, so practice of objective type questions is also one of the aims.

### **Nature of the Entry Level Test:**

There were 30 multiple choice questions on General Science, these questions were divided into three subjects such as Physics, Chemistry and Biology. Each branch of science got the credit of 10 marks.

**Analysis of the Test:** The 21 student-teachers attended this entry-level test, passing criteria for this test is 11 out of 30. Out of 21 student-teachers, two scored only 8 marks, rest 19 student-teachers are passed in the entry-level test.

### **Action Taken:**

The faculty decided to take some remedial measures to improve the class of the student-teachers, for the same

1. The learning resources were searched on the net and links are provided to the student-teachers on Google Classroom.
2. The topics from BED 106-08 General Science were distributed among the student-teachers for the self-learning.
3. The content enrichment program was designed under which the student-teacher has to develop the lesson note, with questions at the end, on that topic, as well as power point presentations for conducting the seminar on peer learners in the classroom setting.
4. The student-teacher has to conduct the seminar cum power- point presentation in the classroom as per the time-table, the participants have to ask questions to the presenter as well as there is Q and A session on the topic.
5. Before conducting the seminar student-teacher has to take the guidance from the faculty, after seminar he has to upload lesson note and PPT on the Google Classroom in the class work section.
6. The faculty shares the links of all the PPTs to all the student-teachers for study purpose.
7. The faculty also developed Science Quiz Google form and shared the link at the time of Science Day.
8. The student-teachers are made compulsory to observe more practice teaching lessons of various peer learners, so that they will get thorough knowledge of the secondary school level science.
9. The number of sample question papers is shared with the student-teachers on BED 106-08 General Science Google Classroom for the practice.

## **BED 106-08 Understanding Discipline and School Subject:**

### **General Science**

#### **Analysis of Entry Level Test**

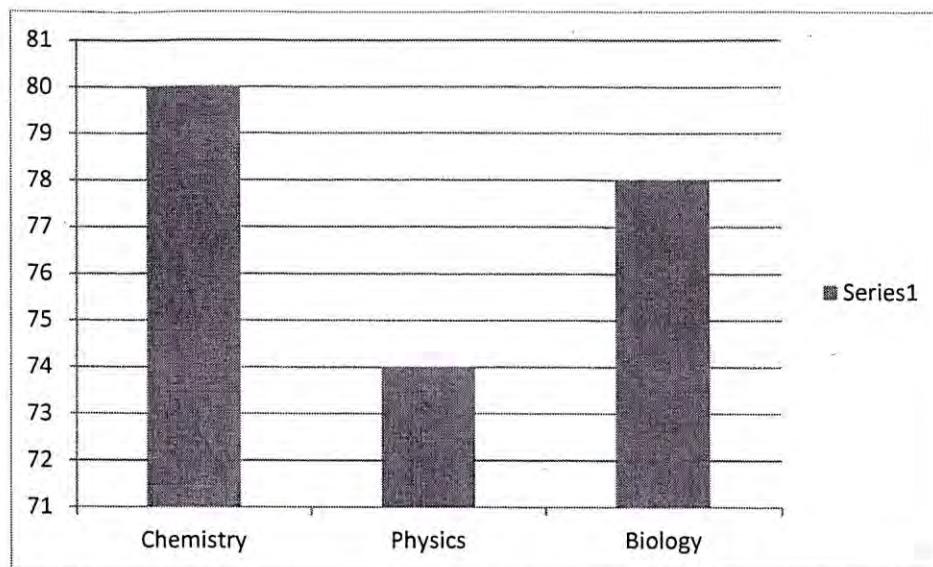

The entry level Test was conducted on the entry of B.Ed. student-teachers before starting the lectures on BED 106-08 General Science, it was expected that the student-teachers are graduate or post graduate in the science faculty so their content knowledge about that subject will be good, so the test was designed in such a way that there will be 10 multiple choice questions from physics, 10 MCQ's from chemistry and 10 MCQ's from biology. The test conducted was 30 marks. The Google form was developed and the link was shared to the students, the timing for the answers was 30 minutes.

#### **Result of the Test:**

**Table No. 1 Showing the Marks of Chemistry, physics and biology**

<b>Sr. No.</b>	<b>Chemistry</b>	<b>Physics</b>	<b>Biology</b>
<b>1</b>	9	8	12
<b>2</b>	10	8	12
<b>3</b>	10	10	9
<b>4</b>	10	11	10
<b>5</b>	9	11	9
<b>6</b>	11	9	9
<b>7</b>	11	11	9
<b>8</b>	10	6	10
<b>9</b>	8	6	6
<b>10</b>	8	9	8
<b>Total</b>	96	89	94
<b>% age</b>	80	74	78

**Graph No. 1 Showing the Marks of Chemistry, physics and biology**

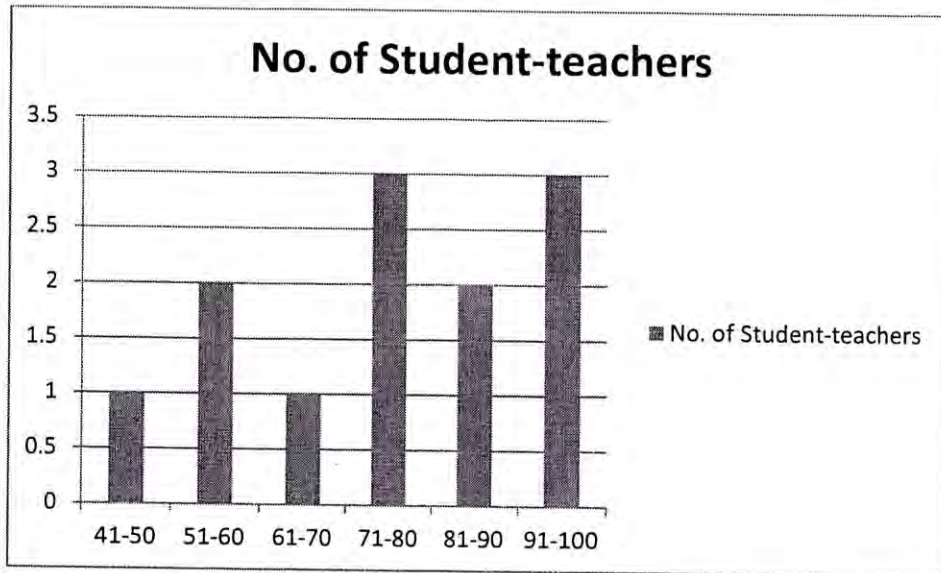

**Interpretation:** It is observed that the student-teachers done absolutely well in all the three branches of the science but they are little bit weak in the physics so they have to pay more attention toward physics, the faculty decided to give more emphasis on the physics.

**Decision Taken:** More inputs toward physics will be given in the schedule.

**Table No. 2 Showing the Marks of 12 student-teachers in the class interval**

Sr. No.	Class Interval	No. of Student-teachers
1	41-50	1
2	51-60	2
3	61-70	1
4	71-80	3
5	81-90	2
6	91-100	3
		12

**Graph No. 2 Showing the Marks of 12 student-teachers in the class interval**

**Interpretation:** It is observed that the student-teachers done absolutely well in all the three branches of the science all the student-teachers did well, many student-teachers scored above 50 marks, only one student-teacher scored below 50, so some student-teachers have to pay more attention toward science, the faculty decided to give more emphasis on the weak student-teachers.

**Decision Taken:** More inputs will be given to such student-teachers and we will schedule extra lectures for them.
